REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: a b c -
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
char item;
  struct Node* next;
  struct Node* prev;
}:
// You are using GCC
void insertAtEnd(struct Node** head, char item) {
 struct Node*newNode=(struct Node*)malloc(sizeof(struct Node));
 newNode->item=item:
 newNode->next=NULL;
 newNode->prev=NULL;
 if(*head==NULL)
   *head=newNode;
```

```
return;
     struct Node*temp=*head;
     while(temp->next!=NULL)
       temp=temp->next;
     temp->next=newNode;
     newNode->prev=temp;
    void displayForward(struct Node* head) {
      while(head!=NULL)
        printf("%c ",head->item);
        head=head->next;
      printf("\n");
    void displayBackward(struct Node* tail) {
      while(tail!=NULL)
        printf("%c ",tail->item);
        tail=tail->prev;
      printf("\n");
    void freePlaylist(struct Node* head) {
      struct Node*temp;
      while(head!=NULL)
        temp=head;
        head=head->next;
        free(temp);
      }
    }
    int main() {
      struct Node* playlist = NULL;
char item;
```

```
240/0/503
                                                          240701503
        while (1) {
          scanf(" %c", &item);
          if (item == '-') {
            break;
          insertAtEnd(&playlist, item);
        struct Node* tail = playlist;
        while (tail->next != NULL) {
          tail = tail->next;
        }
printf("Forward Playlist: ");
displayForward(playlist);
        printf("Backward Playlist: ");
        displayBackward(tail);
        freePlaylist(playlist);
        return 0;
     }
     Status: Correct
                                                                               Marks: 10/10
